# Patterns of 2s, 5s and 10s

Count in multiples of 2, 5 and 10

**You will need:**

- yellow, red and blue coloured pencils

0	1	2	3	4	5	6	7	8	9	10
	11	12	13	14	15	16	17	18	19	20
	21	22	23	24	25	26	27	28	29	30
	31	32	33	34	35	36	37	38	39	40
	41	42	43	44	45	46	47	48	49	50
	51	52	53	54	55	56	57	58	59	60
	61	62	63	64	65	66	67	68	69	70
	71	72	73	74	75	76	77	78	79	80
	81	82	83	84	85	86	87	88	89	90
	91	92	93	94	95	96	97	98	99	100

## What to do

- Ask your child to colour the number 2 yellow, then to make each multiple of 2 yellow, up to 30. Then ask your child to circle 5 in red, and continue circling multiples of 5, up to 50. Lastly, ask your child to underline 10 in blue, and continue underlining multiples of 10, up to 100.

Ask your child to find particular multiples. For example, ask: "Can you find a multiple of 10? Can you find the multiple of 10 that comes before it? ... after it?" Can your child find multiples of 2 after 30 or any multiples of 5 after 50? Can your child see any patterns?
